## EXPERIENCE

**Applied Systems Inc.**                                                                     Buckhead, GA
*Software Developer I*                                                      February 2017 – Present

- Develop one of the industry's leading products with millions of users worldwide using .NET, and SQL
- Improve the quality of the software through constant testing, bug fixing, and the addition of new features
- Utilize Agile Methodologies to constantly improve the quality of the flagship product through heavy team development and coordination

**Applied Systems Inc.**                                                                     Buckhead, GA
*Web Development Intern*                                            August 2016 - February 2017

- Overhauled 7 international websites. Built new Javascript, Razor templates, C#/MVC functionality, and a re-skin/re-design of all HTML and CSS from the ground up.
- Built phone app for my companies biggest conference of the year that was used by over 3 thousand people and was integral to the functioning of the event
- Awarded the "High Impact" award by CEO for my contribution to the company.

**AV Support Technician**                                                         Lawrenceville, GA
*Georgia Gwinnett College*                                               *May 2015 – May 2016*

- Saved the institution thousands on equipment with preventative maintenance
- Was a personal point of contact for customers experiencing technical difficulties
- Often went above and beyond to ensure the school saw a 99% uptime on all systems.
